

Influence ONLINE

ONLINE *Influence*

The good, bad and the ugly!

We consume lots of content in today's digital world.

This could be through You-Tube vid's, social media posts, news articles and content being shared through messaging app's and group chats.

Have some class discussions about online influence. Ask them to share how the content we see online can have both good and bad influence on our thoughts, decisions and behaviour.

This could even give you an opportunity to move into discussing the ugly side of online influence (fake news, upsetting content and unhealthy role models).

Exploring how the online world can influence us, can help children start to 'think critically' about the content they're exposed to online.

Use the next few pages to help your pupils share their views on online Influence.

Please don't forget to take pics and share them online and with us!

Influence

what is it?

Classroom discussion

Influence ONLINE

Break up the class into small groups (positive or negative), discuss how the online world can influence us, in different ways.

Share your ideas with the class after.

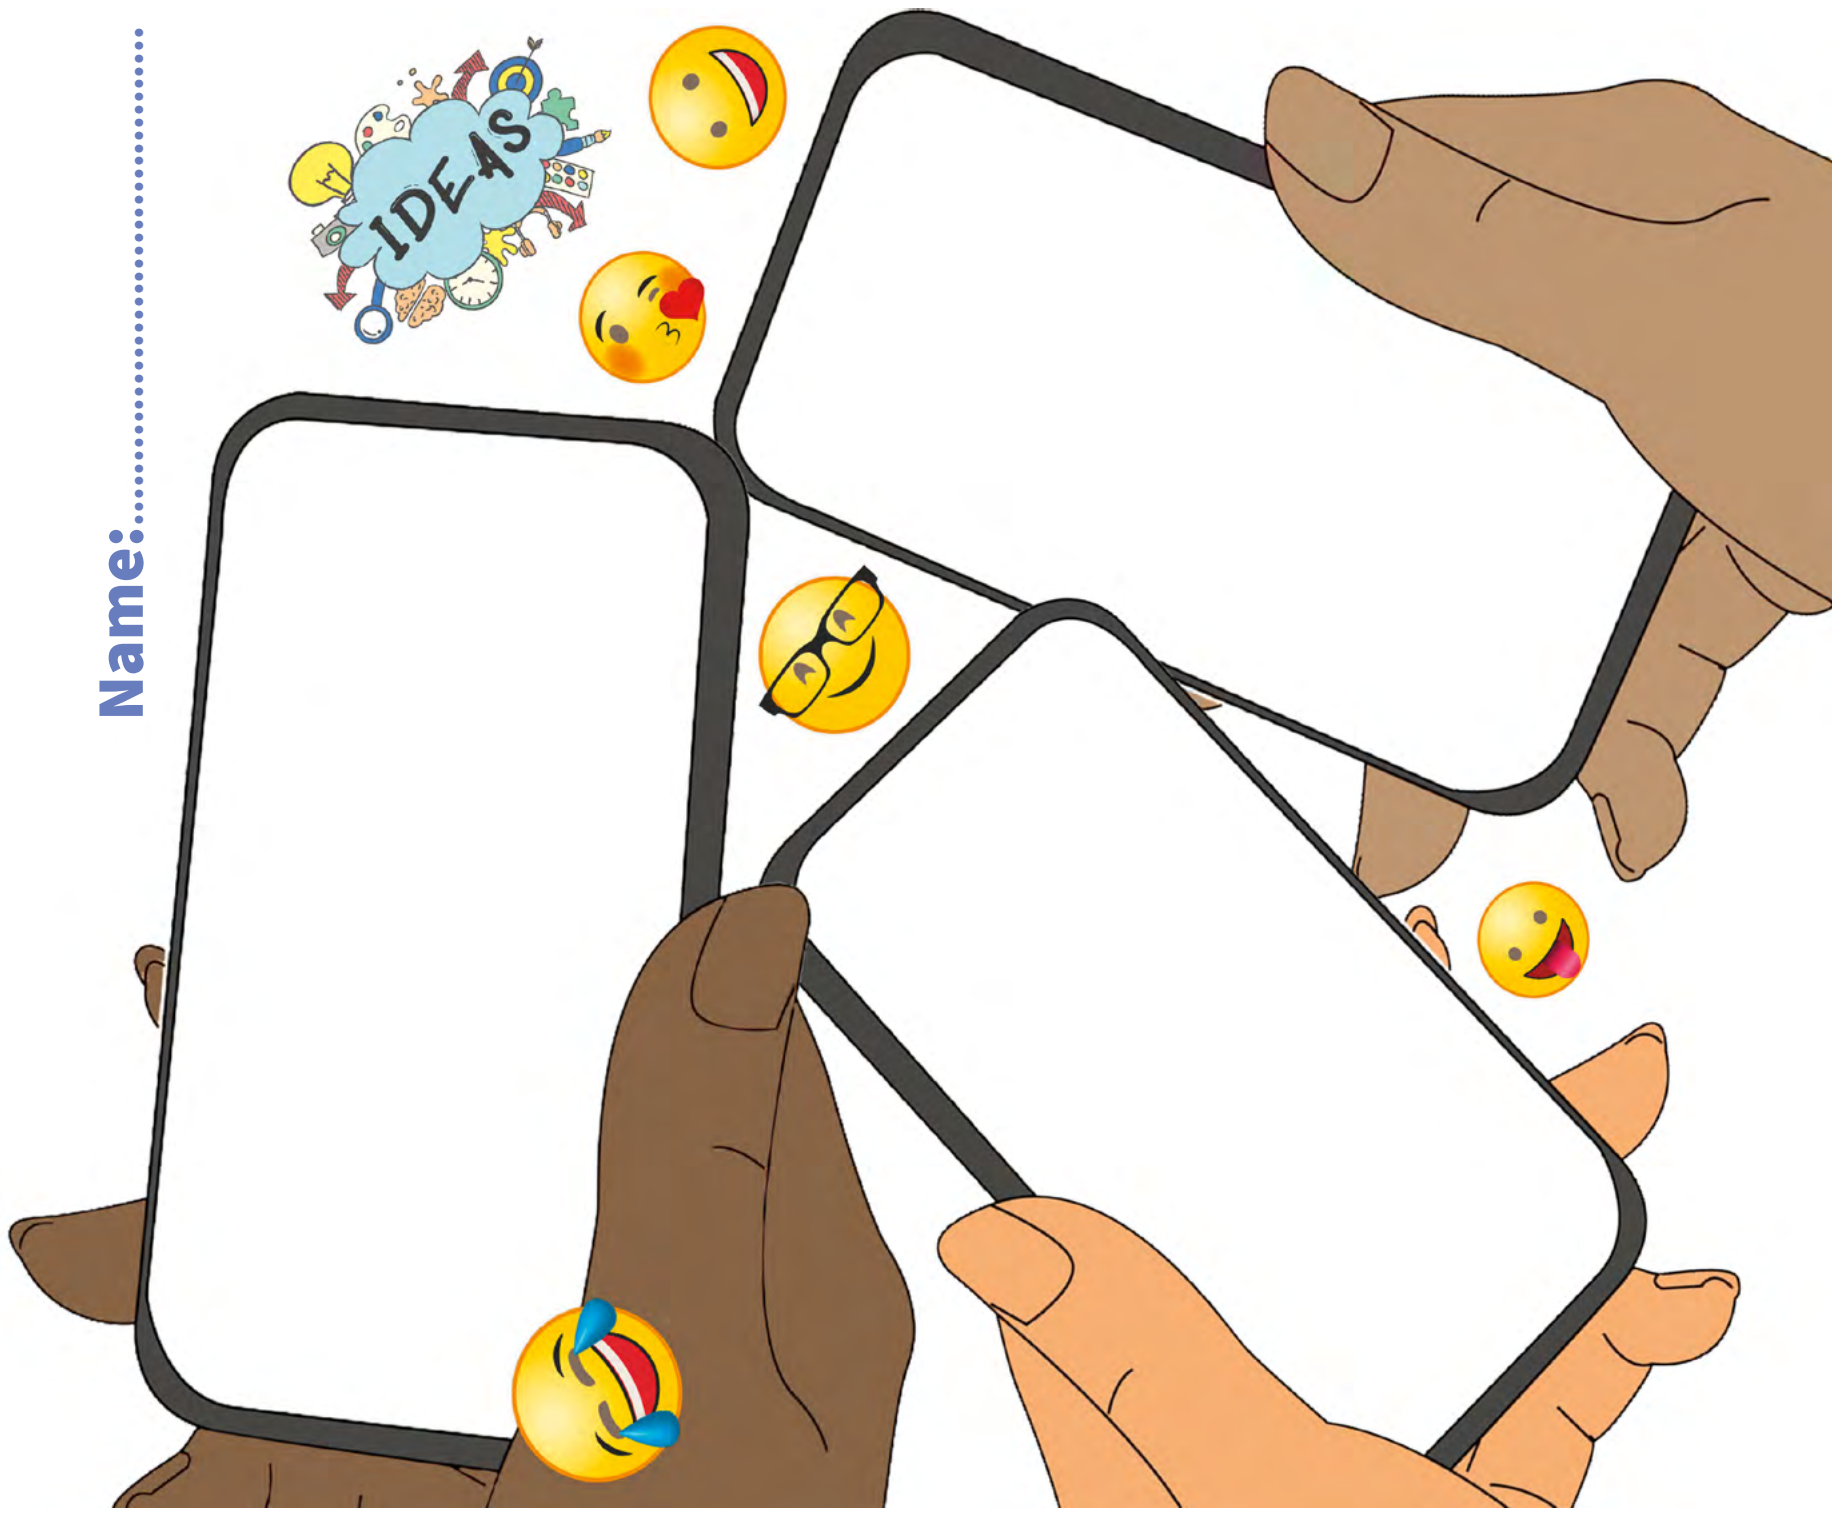

ONLINE Influence

3 positive ways, the online world can influence us.

Name:.....

ONLINE *Influence*

3 negative ways, the online world can influence us.
